Application No. 10/611,468

Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Examiner called to discuss that claims read on polymer coated fasteners and countersunk fasteners with plugs covering countersink. Suggested adding after "Directly to said impact surface" in line 4, claim 1, and 22 -- and after "Directly to said impact surface of the head" in line 4, claim 11: -- prior to said fastener being driven, said filler material not extending past the fastener head--, Mr. Farrell agreed and requested examiner's amendment A follow-up discussion to add "non-threaded" was accepted, and examiner agreed to clarify that non-threaded fasteners would include ribbed nails, such as those used for plaster or roofing.
